13.

To: A. Smith

From: V. Gogen

Subject: Average weekday of a student.

Date: 19/01/2016

Students all over the world spend their ~~time~~^{weekdays} differently. The amount of time dedicated to various activities depends on many various factors. In this report, however, I would like to discuss the life of American students. len.

The information used in this report was collected from online surveys in 2014 and 2015, which can be assessed via Internet now. This data is a great example of the changes in students' life. The amount of time students spent on their holidays, titled as "Other" on these charts, has suffered the most drastic drop. However, the increase in "Leisure and sports" and "Traveling" sections suggests that students caught ~~up~~ on these activities instead. Another noticeable trend is a loss of a whole hour of educational activities. It is safe to suggest that it was substituted by working, as time of it had increased. Indeed, many students start pursuing their career early nowadays. gr. len. gr. pr.

Overall, the data shows minor changes in all sections of the students' life. For example, students eat ~~less~~ more and sleep less than they did in 2014. Grooming ~~also~~ had a loss in time, leaving students with only 0,5 hours. len. hy.

In conclusion, the most noticeable changes happened to students' personal activities, though working, studying and extracurricular activities were also affected.
