### ANSWER SHEET

Participant's ID number

A 9 1 0 0 8

The report about the results of the experiment

In October 2014 our school was offered to try Computer Based Games for English Learners, produced by the ABC company. Pupils from the tenth and eleventh grades were chosen as participants. The main point of the experiment was to ~~XXXX~~ ~~XX~~ try the games, test student's knowledge and to ~~XX~~ check whether they liked games or not.

It was decided to begin with the tenth grade. According to school program, most of the students broaden their horizons and learn new materials, such as Articles or Modal verbs along with their teacher in the class. As <sup>for</sup> ~~for~~ eleventh, it is not compulsory for them to study ~~XXXX~~ with the teacher and they are free to work on their own at home or individually after class, due to the fact that they don't study anything new.

Different types of exercises were chosen for both grades. The tenth grade had to fill in the missing gaps with answers, while the eleventh one was completing the tasks with multiple choices.

Both ~~no~~ tenth and eleventh were quite successful at doing their tasks with a little amount of mistakes.

Unfortunately, the opinion of students differs. The ~~XXXX~~ <sup>tenth</sup> grade valued these games as a wonderful experience and was keen on doing

YOU CAN USE THE REVERSE SIDE

Some more. The eleventh, however, was ~~rather~~ rather bored and ~~unentertained~~ uninterested.

In conclusion, it is possible to say that with some minor fixes, for example increasing the difficulty for the eleventh grade, these games are quite efficient and entertaining.
